

Empathy Map

Date	29 September 2026
Team ID	SWTID-2026-2867
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map

An empathy map helps us understand the user’s needs, thoughts, actions and feelings. For this project, it focuses on a ServiceNow user who needs secure access to records based on the Branch field and assigned roles.

SAYS • “I should see only the records allowed for my branch.” • “Access should be secure.” • “Other branches should not view EEE records.”	THINKS • “My records must be protected.” • “Access should depend on the Branch field.” • “Admins should have full access.”	
DOES • Logs in to ServiceNow. • Views student/institution records. • Accesses records according to role and branch.	PERSONA ServiceNow User EEE Branch User	FEELS • Secure when unauthorized records are restricted. • Confident when the ACL works correctly. • Concerned about unauthorized access.

Script-Controlled ACL – Restrict Record Access Based on Field Value
