

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	SWTID-2026-2867
Project Name	Script Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the functional features included in the project solution. The solution uses a script-controlled Access Control List (ACL) to restrict record access based on a specified field value.

S.No	Feature Name	Feature Description	Module / Component	Status
1	User Authentication	Allows authorized users to securely access the application.	Security	Done
2	Record Access Control	Controls access to records based on a field value.	ACL	Done
3	Script-Based Validation	Checks the field value using an ACL script before allowing access.	ACL Script	Done
4	Role-Based Access	Provides access according to the user's assigned role.	Security	Done
5	Record Visibility Restriction	Prevents unauthorized users from viewing protected records.	ACL	Done
6	Field Value Checking	Checks whether the required field contains an allowed	Backend / Logic	Done

		value.		
7	Unauthorized Access Prevention	Denies access when the required access condition is not satisfied.	Security	Done
8	Access Testing	Tests and verifies both allowed and restricted record access.	Testing	Done

Feature Summary:

Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	1	Record display
2	Backend / Logic	2	Field value checking, access validation
3	Database / Storage	1	Record and field value storage
4	API / Integration	0	Not applicable
5	Security / Authentication	4	ACL, authentication, role-based access, unauthorized access prevention

Project Description: The system uses a scripted Access Control List (ACL) to restrict record access based on a specified field value. The ACL checks the field condition and allows or denies access accordingly, ensuring that only authorized users can view the records.
