

Project Demo Planning

Date	29 September 2026
Team ID	SWTID-2026-2867
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning:

The demo demonstrates how a Script-Controlled Access Control List (ACL) restricts record access based on a field value. The presentation covers the problem, solution, ACL configuration, script logic, live demonstration, and result.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain ACL and the need to restrict record access based on a field value.	1	Member 1
2	Solution Overview	Explain how the scripted ACL checks the field value before allowing access.	1	Member 1
3	ACL Configuration	Show the ACL configuration and the script used to control record access.	2	Member 2
4	Live Feature Demonstration	Demonstrate access allowed or denied based on the selected field value.	2	Member 2
5	Result & Explanation	Show the output and explain why access is allowed or restricted.	1	Member 1
6	Q&A	Answer questions about ACL, scripting, and record-level security.	1	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	ACL controls who can access records.
2	Solution Overview	The script checks a specific field value.
3	Live Feature Demonstration	Show both allowed and restricted access.
4	Q&A Session	Explain the ACL script and security logic.
